Office Action Summary

### CLAIMS

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by  
Hasircoglu et al. (US 6350156).

Regarding claim 1, Hasircoglu shows a foolproof mechanism for modular jack comprising:

A pair of spring members (34 fig. 4, see 30 in fig. 5) each having an abutment section (32, 36) at a front end;

The abutment section having:

A cam portion having an included face (32);

A stopper portion (36);

The insertion of a plug having a predetermined poles by abutting the plug against the cam portion to move the abutment section outwardly (fig. 7); and

The prevention of insertion of a plug having a smaller poles by abutting the plug against the stopper portion (fig. 9).

Regarding claims 2-6, Hasircoglu shows:

The spring member and the abutment section (30);

The spring members are provided along an outside of the housing (see 30 in Fig. 1);  
the spring members (30) are provided opposite sides of a top wall of the housing.

Slots (40);

A shield plate (17).
